

**With the vision of preventing Online Child Sexual Exploitation (OCSE) and all kinds of exploitation and protecting girls all over Cambodia, we'll be approaching it with a 3-step model:**

1. Firstly, we are building Change Agent capacity through encouraging knowledge, leadership, creativity and confidence .
2. Next, we are creating a sense of belonging and additional motivation to facilitate a Sisterhood that multiplies into a sustainable movement.
3. Finally, both of these together facilitate behaviour change, policy change and resilience.

>>>>

**All of which result in protection, prevention, resilient individuals who have the capacity, the structure and the motivation to protect each other and catalyse community engagement.**
